Item #	Description	Dimensions
736088	Swiftscreen Solo Divider	60"H x 30"W Overall

A safe return to public spaces is a major challenge for healthcare facilities, schools, colleges, and universities as they are faced with the challenge of providing adequate physical distancing and infection control within public health guidelines and government mandates.

The COVID-19 pandemic has changed our use of spaces for the foreseeable future. Physical distancing and separations will be challenging for institutions facing the reality of accommodating multiple people in existing spaces.

SwiftScreen SOLO is a simple solution to divide space in smaller areas. Affordable, robust and simple to use, it provides facilities with a vital tool to safely navigate the pandemic.
